

Curbstoning is bad for consumers, dealers & communities

» **Why buy from a licensed used car dealer instead of a private party?**

- Quality – every vehicle we sell is inspected and certified to make sure it's safe and sound.
- Accountability – we have a place of business you can come to with any problems with your purchase.
- Documentation – because our vehicles come from known sources, they carry full documentation.
- Warranty – as a licensed local business, we depend on referrals and repeat business and will do everything we can to ensure your satisfaction.

» **Fraud alert: beware of “curbstoners!”**

Curbstoners are unlicensed car “flippers” who dress up or put together vehicles from salvage yards and third-tier auctions. They pose as private parties to attract customers, avoid taxes, and prevent being tracked down later. The cars look okay, but may have serious electronic, mechanical, or even structural problems. Always have any car you're thinking of buying examined by a mechanic you trust.
